

Wood to make BOX furniture is a finish obtained by means of MDF (Medium Density Fibreboard) panels covered with decorative melamine sheets hot pressed onto the panels. The result is a surface very similar in appearance to wood, since the decorative sheets applied to the MDF panels are faithful reproductions of wooden textures, and pores, roughness and veins are clearly perceived to the touch.

Besides being characterised by high resistance to aqueous vapour and scratches, These surfaces are very easy to clean.

Colours, tones and textures of this Colour Chart are for guidance only. Colours may vary when applied to different materials and be subject to variations through time.

Ceramica Flaminia reserves the right to modify the tones and to widen the range of the colours illustrated without any prior notice.

BOX | Cleaning and maintenance

To clean them, use a soft sponge and a neutral non-abrasive detergent diluted in water. Rinse and dry immediately with a soft, clean cloth. Make sure you never use metal scouring pads, acid detergents, solvents such as turpentine, acetone, alcohol or any other abrasive or acid substance that could undermine the integrity of the surface; pay special attention to limescale removers. We recommend wiping the surface according to the direction of the veins.
